

GENERAL LAYOUT PLAN OF THE AREA

SECTION B B

SECTION A A

General urban concept

Continuity of encountering of students and professors from other faculties
 Or continuity of conversation with people from other institutes
 That is important
 As precisely as it would be to have the communication here, along the academic porch or by the waterway at rooftop

Academic porch could be at the same time the space of everyday communication between the inhabitants of neighboring blocks 38 and 28
 The porch has real potential to act as it was told after the fact that it covers the part of common pedestrian axis

Underground parking respects this 'waterway' concept, leaving the space to the greenery

In brief:
 To gather and attach neighbors (in and out of the block)
 To acquire as much green area as possible

The manner of realization of this slogan is close to the essential nature of New Belgrade and New Belgrade's block

Aftermath:

Three parades, different in character, marked as follows:

Tesla's parade: as park, closely connected to the Center for Promotion of Science

Pupin's parade: a kind of University park

Milanković's parade: green area within submerged University of Arts and Mathematical High School
