0 100 m

site plan

lightwells / voids from roof to ground and subterranean level

lightwells contain plants and trees

relation between vertical circulation and lightwells / voids

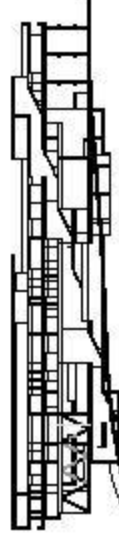

natural daylight to programs on ground and first floor

sports facilities also to be used separately and accessible directly from outside

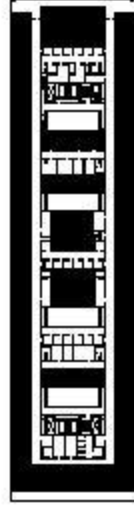

continuous staircase enables visual relation from roof garden into the valley

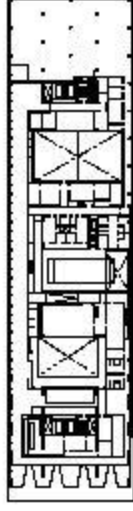

terrain is returned to original condition

entrance level is double-height

programme in need of daylight positioned along the facade and lightwells

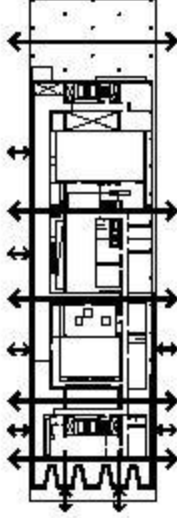

an individual entrance for the Ronald McDonald house

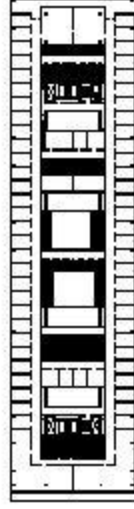

vertical layering of the programme

a strong relationship between the building's facade and its immediate surrounding

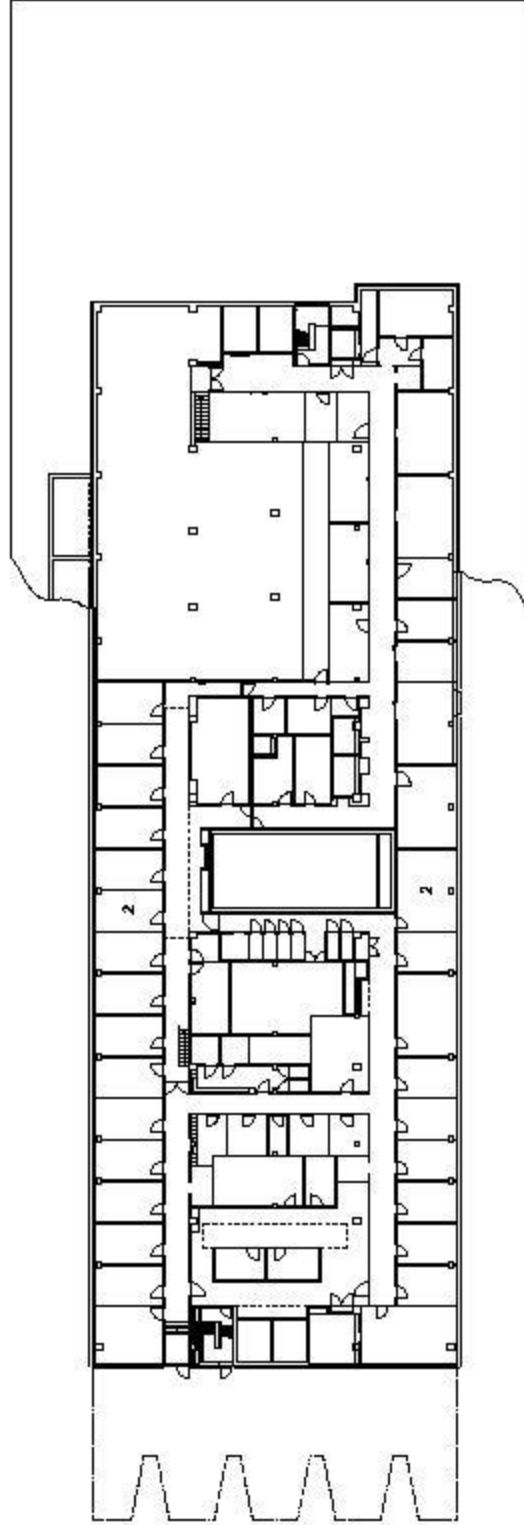

the glazed facade at entrance level results in an abundance of natural daylight, prospect and transparency

programme in need of daylight positioned along the facade and lightwells

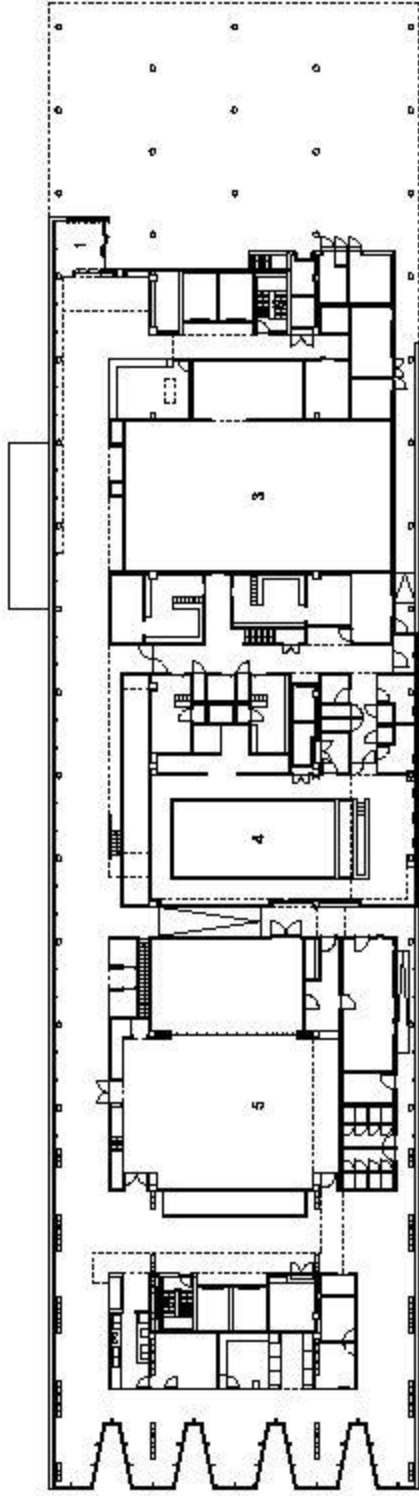

minimum footprint

level -1

0 20 m

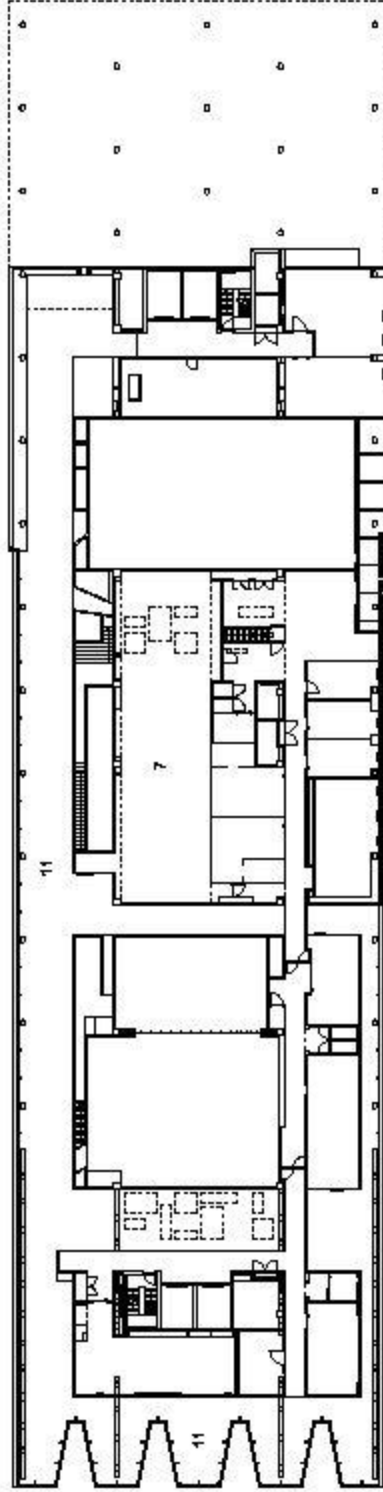

- 1 entrance
- 2 office
- 3 gymnasium
- 4 swimming pool
- 5 toilets
- 6 restaurant
- 7 fitness centre
- 8 room for patient
- 9 living room
- 10 rowing machine house
- 11 void
- 12 patio

level 0
