

## **Nominees of East Centric Arhitext Awards competition!**

East Centric Arhitext Awards, the IIIrd module of East Centric Architecture Triennale organized by Arhitext design Foundation, was dedicated to exhibiting, debating and awarding the most valuable architecture and urban planning projects realized in the last 5 years in countries from Central and Eastern Europe.

This module was based mainly on the contest bearing the same name: East Centric Arhitext Awards competition (ECAA), which brings together the best projects in the field of architecture and urban planning achieved in the region of Central and Eastern Europe in the last 5 years. The ECAA 2013 contest relies on the previous experience gained by the Arhitext team in organizing 11 editions of the Arhitext design Awards national contest.

In this year ECAA competition we have 14 projects in in Regeneration section, 16 in Residential Buildings section, 24 in Public buildings section, 18 in Exterior design section and 15 in Interior design. There is a total number of 87 projects participating in the contest, from 24 of the East Central European countries.

The projects from each category have already been evaluated, in a first stage, by each of the sections' juries and their president. After the presentations of the present biros and the final judging on 26 of October the winners of each section were announced.

The nominees and the winners, in random order, in each section are:
