KITCHEN VENTILATION

victoria

Intelligent Monitoring System

LEARN HOW REMOTE MONITORING CAN BENEFIT YOUR KITCHEN

The remote monitoring system, Victoria, observes and manages what's happening within your kitchen from wherever your business takes you.

Victoria saves time and labor costs, keeps track of energy consumption and detects potential threats.

Victoria boosts productivity and safety by staying on top of equipment maintenance.

Victoria responds to unexpected events effectively online making it easier to oversee critical operations and respond quickly when equipment malfunctions helping you to get back on course
